

Design-Build Concrete System Consulting

DESIGN-BUILD TEAMS WITH TCG HAVE AN EDGE OVER COMPETITION AND CONCRETE COSTS.

www.tourneyconsulting.com

Design-build is an integrated project delivery method that combines design and construction processes into a single contract. New concrete materials, protection systems, reinforcement systems, and surface treatments have multiplied the options available for designing and constructing durable structures. There are also complexities that accompany the wide array of options. TCG understands these complex issues and will use the wide array of options to formulate the most cost effective concrete system. TCG will document the durability performance and provide monitoring services to maintain quality throughout the project construction. Having TCG on your design-build team assures the lowest cost concrete system.

- TCG services compliment contractor estimation / procurement processes and structural engineering services.
- Design-build teaming with TCG drives the cost of concrete down but maintains necessary or required performance objectives.
- TCG uses advanced predictive tools and software to optimization efforts.
- TCG methods are accepted by private and public organizations throughout the USA.
- Field testing and laboratory services are in-house providing instant availability and responsive results for the design-build team.
- Confidential and professional services compliment the D-B teaming environment.
- Design-build services can be procured on a fixed price, guaranteed maximum price or fee basis, depending on the owner's or team's needs.
