TCG provides concrete materials expertise to government agencies, design-build teams, design professionals, and owners interested in obtaining durable and cost-effective concrete projects. Our unique combination of concrete materials experts and in-house laboratory capabilities are ready to assist your design team in a variety of areas:

TCG Engineering Services for New Construction:

- Service life prediction/modeling/design
- Material selection for corrosion prevention
- Performance-based concrete specifications development
- Mass concrete thermal modeling/analysis/optimization
- Design-Build consulting services (concrete mix cost optimization)
- Life cycle cost analysis
- Construction variance resolution
- Innovative application of new and existing materials

Today's owners demand more durable concrete construction. TCG's staff is uniquely qualified to provide materials engineering services to help owners, design teams, and contractors faced with durability and initial construction cost challenges.

Put TCG to work for you!

Confident low cost concrete system designs that LAST!

Specialized Durability Analysis and Design
